

Intrinsically safe autophone ZITG -02

Autophone ZITG-02

Intrinsically safe autophone
ZITG-02 for Ex environment

Advantages:

- ✓ Can be used in operations with high levels of noise, dust and humidity
- ✓ Wide range of adjustable functions
- ✓ Visual and acoustic call signaling
- ✓ ATEX certification

The integrated intrinsically safe autophone type ZITG 2 is a universal means of telephone connection. It enables dispatching connection (simplex) and classic telephone connection. The housing of the device is made of high-strength plastic in the IP 65 design, which predestines it for use in industrial conditions, in open outdoor environments and in environments with a risk of explosion. All functions of the device and cooperation with cards are controlled by DTMF tones and line polarity.

Important note: Technical parameters of the ZITG-02 product may be changed. Please contact us for further technical advice and tailor-made solutions.
